Plugin Release Date: Mon Jul 05 04:00:00 MSD 2010

Block Unknown URLs:  ON  OFF

It is always recommended to keep this setting ON in a production environment

Store Unknown URLs:  ON  OFF

Logging Level:

Save

## Update History Entries

## Field Security Plugin - Update Issue Change History Items

The table below shows items of issues change history, which were made before JFS Plugin installation and thus do not have associated Custom Field Id.

Select the corresponding Custom Field for each item you want to secure with JFS.

Generally the system can guess the right Custom Field by name, except for:

- Deleted fields
- Renamed fields
- Fields that share the same name

ID	Project	Issue	Field	Corresponding Custom Field	Update
10511	BrigSoft Management	MGM-2	Test:	Select a custom field...	<input type="checkbox"/>
10500	BrigSoft Management	MGM-2	Test:	Select a custom field...	<input type="checkbox"/>
10652	BrigSoft Management	MGM-1	Test:	Select a custom field...	<input type="checkbox"/>
10651	BrigSoft Management	MGM-2	Test:	Select a custom field...	<input type="checkbox"/>
10650	BrigSoft Management	MGM-3	Test:	Select a custom field...	<input type="checkbox"/>
