

# Field Security Plugin Security Advisory 2017-03-02

## Issue 1 (ref# JFSSUP-230)

A cross-site scripting (XSS) vulnerability has been identified and fixed in Field Security Plugin for JIRA.

This vulnerability is rated as **Critical** according to [Atlassian's Severity Levels for Security Issues](#).

This issue affects all JFS versions for JIRA 6.0-7.3 starting from JFS 1.4.32\_60 and up and is fixed in JFS 1.4.37 for JIRA 6.0-7.3.

## How to fix

### JIRA 6.0 and later

Upgrade to JFS 1.4.37. There is no need to re-apply the JFS patch.

1. [Ensure support & maintenance is active](#) for your license.
2. Navigate to [Downloads page](#)
3. Download JFS 1.4.37 plugin JAR file according to your JIRA version
4. Upgrade the plugin using JIRA Universal Plugin Manager ("Manage Add-ons")
5. Restart your JIRA instance immediately (Note: this is mandatory!)
6. There is no need to re-apply the JFS patch
