

Field Security Plugin Security Advisory 2020-06-22

Issue 1 (FS-312)

Under some circumstances a user with access rights limited according to the field security scheme may be able to access a hidden field value.

This issue affects security features provided by Fields Security Plugin only and does not affect any core Jira features.

This vulnerability is rated as **Critical** according to [Atlassian's Severity Levels for Security Issues](#).

This issue affects all JFS versions for JIRA 8.0-8.8 starting from JFS 1.4.49_80 and up and is fixed in JFS 1.4.59 for JIRA 8.0-8.9.

How to fix

JIRA 8.0 and later

Upgrade to JFS 1.4.59. There is no need to re-apply the JFS patch.

1. [Ensure support & maintenance is active](#) for your license.
2. Navigate to [Downloads page](#)
3. Download JFS 1.4.59 add-on JAR file according to your JIRA version
4. Upgrade the add-on using JIRA Universal Plugin Manager ("Manage Add-ons")
5. Restart your JIRA instance immediately (Note: this is mandatory!)
6. There is no need to re-apply the JFS patch

Please contact support@quisapps.com in case of any questions.
