JFS 1.3.2 Release Notes

Fixed in 1.3.2

- Support for non-standard project keys (e.g. `JRA:ONE`)

[Download JFS 1.3.2](#)

Fixed in 1.3.1:

- License can not be installed with the message `java.lang.ClassNotFoundException: de.schlichtherle.xml.GenericCertificate`

Improvements in 1.3:

- Compatibility with JIRA 4.3.x

Fixed in 1.3:

- Hidden fields become visible on Issue Create Screen if new issues is submitted without any of required fields (JFSSUP-16);
- Version Workload Report is blocked with the message "You can not use this parameters combination due to security restrictions" even for users who actually have the permissions.

ⓘ **Attention International Users**

If you are using non-English language and your default operating system encoding is not UTF-8, it is strongly recommended to set Java default encoding to UTF-8. To do this: set Java property `file.encoding` to UTF8: `-Dfile.encoding=UTF8`.
You can find more info on how to set Java property for Tomcat installed as a Windows Service here: http://confluence.atlassian.com/display /JIRA/Setting+Properties+and+Options+on+Startup#SettingPropertiesandOptionsonStartup-TomcatinstalledasaWindowsService%3A

Fixes and Improvements in previous versions

Version	Description	Fix	Improvement
1.2.3	Create/Edit/Transition Issue screen layout is broken in JIRA 4.2.3 & 4.2.4 if there is an Attachment field on the screen not at the last position due to http://jira.atlassian.com/browse/JRA-23635 (JFSSUP-14)	✅
